Product Feature of Cone crusher

1. XCMG PY multiple-cylinder hydraulic cone crushers have an optimized combination of crushing speed, stroke and crushing power ratio, which greatly enhances through capacity.
2. Hydraulic adjusting device and XCMG intelligent control system enable the crusher to output through a constant discharge opening, which largely stabilizes both production process and product quality.
3. The overall machine will gain higher operation safety if it's matched with an iron release function and cavity clearance function.
