

Engineering & Construction Crane

XCR55L5_E Hoisting Machinery

- **Product Category:** Crawler Crane
- **Brand:** XCMG
- **Model:** XCR55L5_E
- **Price:** \$100000.00-\$1000000.00 / EA
- **Delivery Time:** 1-90DAYS
- **Supply Capacity:** 1-500UNITS / Year
- **Product Origin:** China
- **After-sales Service:** Engineers available to service machinery overseas.

Product Feature of XCR55L5_E Hoisting Machinery

- Truck crane is widely used for the lifting operations in general engineering projects, such as construction site, urban renewal, communication and transportation, ports, bridge, oilfields and mine, and complex working environments. 1. 5-section boom of 40.5m with U-type profile is adopted; the max. lifting load is 25 t; the max. lifting height is 48.1m; the max. working radius is 38.4 m; all capacities take the lead in its class.
- Abundant configurations suitable for various working conditions, meet more diverse personalized requirements.
- Suitable for applications in rainy, high temperature and humidity working environments and can continuously work without downtime in ambient temperature of 50°C.
- Abundant configurations of operating methods and jib types can meet the

Parameters of XCR55L5_E Hoisting Machinery

Item	Unit
Maximum rated lifting capacity	55t
Fully-extended boom	43.6m
Engine rated power	209kW/2000rpm
Maximum travel speed	25km/h
Maximum grade ability	86%
