

# Concrete Machinery

## HBC10022V Truck-Mounted Concrete Line Pump

- **Product Category:** CONCRETE MACHINERY
- **Brand:** XCMG
- **Model:** HBC10022V
- **Price:** \$100000.00-\$1000000.00 / EA
- **Delivery Time:** 1-90DAYS
- **Supply Capacity:** 1-500UNITS / Year
- **Product Origin:** China
- **After-sales Service:** Engineers available to service machinery overseas.

### Product Feature of HBC10022V Truck-Mounted Concrete Line Pump

Truck-mounted concrete line pump is dedicated pumping equipment that transporting ready-mixed concrete to construction site through pipelines continuously, safely, reliably and efficiently so as to achieve efficient and mechanized construction of concrete.

## Parameters of HBC10022V Truck-Mounted Concrete Line Pump

| Item                         | Unit              | Parameter      |
|------------------------------|-------------------|----------------|
| Outline dimension            | mm                | 9185×2510×3148 |
| Driving type                 | -                 | 4×2            |
| Chassis                      | -                 | Dongfeng       |
| Chassis engine power         | kw                | 132            |
| Puming electric motor        | -                 | DEUTZ          |
| Rated power                  | kw                | 186            |
| Emission standard            | -                 | Euro V         |
| Theoretical output           | m <sup>3</sup> /h | 100/55         |
| Theoretical pumping pressure | MPa               | 12/22          |
| Inner diameter*stroke        | mm                | φ230×1600      |
| Pipe                         | -                 | optional       |
