HGP32 Concrete Placing Boom

- **Product Category:** CONCRETE MACHINERY
- **Brand:** XCMG
- **Model:** HGP32
- **Price:** \$100000.00-\$1000000.00 / EA
- **Delivery Time:** 1-90DAYS
- **Supply Capacity:** 1-500UNITS / Year
- **Product Origin:** China
- **After-sales Service:** Engineers available to service machinery overseas.

Product Feature of HGP32 Concrete Placing Boom

Concrete placing boom is an equipment that is used together with concrete pump. It is mainly used in combination with a trailer pump or vehicle-mounted pump. It can be raised in the building along with the rise of the floor. It is an ideal equipment for pouring of concrete, especially for high-rise buildings, which has the features of large spreading range and high pouring efficiency.

Parameters of HGP32 Concrete Placing Boom

Item	Unit	Parameter
Max. placing radius	m	32
Free standing height	m	21
Slewing range	-	370°
Delivery pipeline diameter	-	DIN125
Motor power	kw	22
Hydraulic pressure	MPa	33
Mode of climbing	-	Top-climbed oil tank
Total weight	kg	20000
Max.lifting weight	kg	6800
