

Concrete Machinery

HZS180V Concrete Batching Plant Commercial Type

- **Product Category:** CONCRETE MACHINERY
- **Brand:** XCMG
- **Model:** HZS180V
- **Price:** \$100000.00-\$1000000.00 / EA
- **Delivery Time:** 1-90DAYS
- **Supply Capacity:** 1-500UNITS / Year
- **Product Origin:** China
- **After-sales Service:** Engineers available to service machinery overseas.

Product Feature of HZS180V Concrete Batching Plant Commercial Type

Concrete batching plant is a kind of periodical forced mixing equipment. It mainly consists of aggregate burdening delivery system, powder storage supplying system, liquid storage supplying system, weighing system, mixing system, electric control system and main tower framework, etc. It is a kind of automation equipment that automatically weighs multiple raw materials (aggregate, cement, coal ash, water and additive) as per a formula, mixes through forced mixer and produces finished concrete meeting requirements. The plant features high weighing precision and reliable continual running. It is applied to large-scale construction projects and building that demands for high quality concrete, such as high-speed railway, large-scale bridge, nuclear power plant and water conservancy and hydropower engineering.

Parameters of HZS180V Concrete Batching Plant Commercial Type

Item	Unit	Parameter
Theoretical capacity	m ³ /h	180
Capacity of mixer	m ³	3
Installed capacity	kw	270
Aggregate bin	m ³	4×25
Conveyor type	-	Belt
Additive bin	-	2×10T
Silo	-	4×200T
