

Concrete Machinery

HZS180VG Concrete Batching Plant Project Type

- **Product Category:** CONCRETE MACHINERY
- **Brand:** XCMG
- **Model:** HZS180VG
- **Price:** \$100000.00-\$1000000.00 / EA
- **Delivery Time:** 1-90DAYS
- **Supply Capacity:** 1-500UNITS / Year
- **Product Origin:** China
- **After-sales Service:** Engineers available to service machinery overseas.

Product Feature of HZS180VG Concrete Batching Plant Project Type

Concrete batching plant is a kind of periodical forced mixing equipment. It mainly consists of aggregate batching conveying system, powder storage supplying system, liquid storage supplying system, weighing system, mixing system, electric control system and main tower framework, etc. It is a kind of automation equipment that automatically weighs multiple raw materials (aggregate, cement, coal ash, water and additive) as per a formula, mixes through forced mixer and produces finished concrete meeting requirements. The plant features with small area occupation, reliable continuous operation of whole facility, high weighing precision, etc. It mainly used for construction projects of high quality concrete, such as railway, highway, bridge, port, wharf and building projects.

Parameters of HZS180VG Concrete Batching Plant Project Type

Item	Unit	Parameter
Theoretical capacity	m ³ /h	180
Capacity of mixer	m ³	3
Installed capacity	kw	291
Aggregate bin	m ³	4×25
Conveyor type	-	Bucket
Additive bin	-	2×10T
Silo	-	4×200T
