Product Feature of XE215SLL Crawler Excavator

Using XCMG's proprietary matching technology, XE215SLL has higher operation efficiency and less fuel consumption, and its fuel efficiency ratio is ahead of the models of the same tonnage at home and abroad. The hollow buoyancy box structure provides enough buoyancy to float the whole machine on the water, ensure the transfer of the whole machine in deep water and the maximum operating depth is 1.5m. The traveling mechanism adopts strengthened key parts for the chain rail joints, which greatly improves the service life of the crawlers.
