

Road Construction & Maintenance Machinery

XKC163 Powder binder spreader

- **Product Category:** Road Machinery
- **Brand:** XCMG
- **Model:** XKC163
- **Price:** \$100000.00-\$1000000.00 / EA
- **Delivery Time:** 1-90DAYS
- **Supply Capacity:** 1-500UNITS / Year
- **Product Origin:** China
- **After-sales Service:** Engineers available to service machinery overseas.

Product Feature of XKC163 Powder binder spreader

XKC163 powder binder spreader is mainly suitable for distributing powder materials such as cement, lime and fly ash, and used for cement spraying for highway cold regeneration construction, stabilized soil and a variety of adhesives spraying for roadbed, and can also be used for powder material spraying for other working conditions. Powder binder spreader is key equipment for highway cold-in-place regeneration construction it is special equipment for stabilized soil construction, widely used in highway and municipal construction. With characteristics of high efficiency, environmental protection, simple operation, good construction quality and high reliability.

Parameters of XKC163 Powder binder spreader

Description	Unit		Parameter value
Rated production rate	t/h		120
Mixing capacity	kg /batch		1750
Fuel consumption rate	kg/t		≤6.5
Dust emission concentration (bag dust)	mg/Nm ³		≤20(Washing material)
Blackness of exhaustion(Ringelman Level)	Level		≤I
Static measurement accuracy	Aggregate	%	±0.3
	Powder	%	±0.3
	Asphalt	%	±0.2
Dynamic measurement accuracy	Aggregate	%	±2.5
	Powder	%	±2.5
	Asphalt	%	±2.0
Total installed power	kW		332
Maximum stand-alone power	kW		75
Occupied area	m ²		841 (29m×29m)
