

Road Construction & Maintenance Machinery

XLY105T Pavement maintenance vehicle

- **Product Category:** Road Machinery
- **Brand:** XCMG
- **Model:** XLY105T
- **Price:** \$100000.00-\$1000000.00 / EA
- **Delivery Time:** 1-90DAYS
- **Supply Capacity:** 1-500UNITS / Year
- **Product Origin:** China
- **After-sales Service:** Engineers available to service machinery overseas.

Product Feature of XLY105T Pavement maintenance vehicle

XLY105T pavement maintenance vehicle is applicable for the rapid repair of chuck holes on highway, national and provincial trunk roads, municipal roads and asphalt pavement, and can meet various construction process requirements such as rapid heating of cold finished product mixture, regenerative heating of milling old materials, field frying of asphalt mixture. In addition, the vehicle is characterized by multiple function in one machine, easy operation and high reliability.

Parameters of XLY105T Pavement maintenance vehicle

Parameter	XLY105T
Drum bunker Effective capacity	0.5 m ³
Screed heating mode	Heated air circulation
Discharging speed	380 kg/min
Feeding hopper capacity	0.11 m ³
Single heating time of mixing silo	15~20 min
Feeding mode	Hydraulic automation
Hot asphalt system Tank body capacity	480 L
Screed heating mode	Diesel burner
Emulsified asphalt system Tank body capacity	40 L
Screed heating mode	Electrical heating (1kw)
Diesel cleaning box volume	15 L
Chassis type	Donfeng Duolika EQ1090SJ8BDC
Engine type	CY4SK251
Engine power/speed	115/2800 kW/r/min
Driving type	4×2
Emission standard	China Stage V
Maximum traveling speed	103 km/h
