

Road Construction & Maintenance Machinery

XLY605B Pavement maintenance vehicle

- **Product Category:** Road Machinery
- **Brand:** XCMG
- **Model:** XLY605B
- **Price:** \$100000.00-\$1000000.00 / EA
- **Delivery Time:** 1-90DAYS
- **Supply Capacity:** 1-500UNITS / Year
- **Product Origin:** China
- **After-sales Service:** Engineers available to service machinery overseas.

Product Feature of XLY605B Pavement maintenance vehicle

XZJ5185TYH(XLY605B) pavement maintenance vehicle is an insulated material storage type maintenance vehicle, which can achieve heating and heat insulation of asphalt mixture by adopting diesel burner and electric heating; in addition, optional pavement heating wall and intelligent feeding system can be used to efficiently complete "large-area pit slots repair" and "in-situ recycling"; pavement maintenance vehicle has multiple functions of pavement cutting, crushing, emulsified asphalt spraying, discharging, compaction and waste storage, it is easy to operate and widely used for rapid repair and daily maintenance of pit slots on highway, national and provincial pit slots roads, municipal roads and asphalt pavement.

Parameters of XLY605B Pavement maintenance vehicle

Parameter	XLY605B
Insulation bunker Volume	6 m ³
Insulation effect (temperature drop)	≤2 °C/h
Heating wall (optional) Effective area	2.5 m ²
Heating depth	6 cm
Emulsified asphalt system Asphalt tank capacity	200L
Diesel cleaning box volume	50 L
Waste recovery bin volume	1.2(2×0.6) m ³
Chassis Type	JAW CA1160P62K1L2A1E5Z
Engine type	CA4DK1-22E6
Engine power	165/2300 kW/r/min
Drive modes	4×2
Emission standard	China-VI
Maximum speed	89 km/h
