

Sanitation Machinery

XZJ5181GQX High-pressure Cleaning Truck

- **Product Category:** Sanitation Machinery
- **Brand:** XCMG
- **Model:** XZJ5181GQX
- **Price:** \$100000.00-\$1000000.00 / EA
- **Delivery Time:** 1-90DAYS
- **Supply Capacity:** 1-500UNITS / Year
- **Product Origin:** China
- **After-sales Service:** Engineers available to service machinery overseas.

Product Feature of XZJ5181GQX High-pressure Cleaning Truck

There are two sets of independent water channel system: high and low pressure; high pressure is used for cleaning of road surface, curb, sidewalk and guard bar separation area; and low pressure is used for water spraying for dustfall and watering for green area. High pressure spray gun can be used for cleaning of road sign, advertising board and elevated road.

(1) Diversified Application, Powerful Cleaning

High pressure system can sufficiently utilize the kinetic energy of high pressure water flow to clean road surface by high pressure and low flow, which is highly effective and water-saving. The low pressure system has such functions as water spraying, road cooling and dustfall, washing of dust and dirt, road maintenance, garden watering and emergency fire fighting, etc.

(2) Flexible Operation, High Adaptability

There are multiple modes: front-spray, opposite-flushing, rear-sprinkling and flushing; the cleaning points can be separately controlled in cab, which improves the operation flexibility and adaptability to specific working conditions.

Parameters of XZJ5181GQX High-pressure Cleaning Truck

Item	Unit	Parameter
Total Weight	kg	18000
Rated Payload	kg	8915
Max. Speed	km/h	98
Max, Sprinkler Pressure	Mpa	13
Sprinkler Flow	L/min	600-800
Water Gun Range	m	38
Tank Volume	m ³	9.1
Working Speed	km/h	5.20
